2**Air Event
Interrupt**

Hybrid vehicle technology advances. Fuel consumption in hybrids decreases creating less air pollution and using less fossil fuel.

4**Water Event
Interrupt**

Local and federal water pollution restrictions increase forcing industries to release less pollutants into the water supply.

1**Water Event**

Fishing technology advances. Enhanced fishing net designs decrease collateral catches. This lessens the strain on important global fish populations.

1**Land Event
Interrupt**

Biotechnology advances. Pest resistant plants require less fertilizer and pesticides reducing pollution to arable land.

1**Global Event
Interrupt**

Industrializing nations curb their economic growth slightly resulting in less industrial air pollution. This event can satisfy a water, air, or land requirement.
